PROFESSIONAL SUMMARY

Computer Science Engineering graduate with a strong foundation in full-stack web development using JavaScript, React.js, Node.js, Express.js, MongoDB, PostgreSQL, and REST APIs. Built academic and personal projects involving responsive web applications, authentication, API integration, databases, and debugging. Also have hands-on project exposure to Python and AI/ML through financial data analysis. Eager to learn modern AI technologies and contribute to full-stack and AI-enabled applications.

TECHNICAL SKILLS

Programming: JavaScript (ES6+), Java, Python, SQL

Frontend: HTML5, CSS3, React.js, Bootstrap, Responsive Web Development

Backend: Node.js, Express.js, FastAPI, REST APIs, JSON

Databases: MongoDB, PostgreSQL, MySQL

AI/ML: Generative AI, OpenAI API integration, Scikit-learn, Prompt Engineering, Machine Learning

Deployment: Vercel, Render, Cloud Deployment Concepts

Tools: Git, GitHub, Postman, VS Code

Core: API Integration, Authentication, Debugging, Error Handling, DSA, OOP

EDUCATION

R.R. Institute of Modern Technology, Lucknow (AKTU) 2023–2026

Bachelor of Technology in Computer Science & Engineering — CGPA: 7.64/10

Janta Polytechnic 2020–2023

Diploma in Computer Science & Engineering — 70%

PROJECTS

CreditSense – AI-Driven Financial Analytics Platform GitHub

- Developed a full-stack financial analytics platform using React.js, Node.js, Express.js, Python, FastAPI, and PostgreSQL to process transaction data and generate financial insights.
- Built backend REST APIs and a separate Python FastAPI service for data processing, validation, prediction workflows, and communication between application components.
- Implemented automated PDF/CSV transaction-processing workflows and transformed raw financial data into structured datasets for downstream analysis.
- Worked with PostgreSQL for persistent data storage and implemented database operations supporting transaction analysis, feature processing, and application workflows.
- Performed API testing, debugging, validation, and integration checks using Postman, while using Git and GitHub for version control and iterative development.
- **Technologies:** React.js, JavaScript, Node.js, Express.js, Python, FastAPI, PostgreSQL, SQL, REST APIs, Git, GitHub, Postman

TempShare – Secure Cloud File Sharing Platform Live Demo

- Developed and deployed a full-stack application using React.js, Node.js, Express.js, and MongoDB for secure temporary file sharing with authentication and controlled access.
- Built REST APIs for frontend-backend communication and implemented request validation, access-control logic, secure file handling, and structured error handling.
- Integrated MongoDB for application data management and worked across frontend, backend, database, and deployment layers to maintain reliable application behavior.
- Tested REST API endpoints using Postman and debugged integration issues across application components and deployed environments.
- **Technologies:** React.js, JavaScript, Node.js, Express.js, MongoDB, REST APIs, Git, GitHub, Postman, Vercel, Render

ACHIEVEMENTS

- Solved 400+ Data Structures and Algorithms problems on LeetCode, strengthening analytical thinking, logical reasoning, debugging, and problem-solving skills.
- Built and deployed software applications covering frontend development, backend services, REST APIs, databases, authentication, testing, debugging, cloud deployment, and version control.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Foundations Associate – Oracle
- MERN Stack Summer Training – Techpile Technology Pvt. Ltd.
- Software Testing Certification – Great Learning
